

9 PUCK RELAY RACE

Players line up along the boards, below the blue line on opposite sides of the rink.

Each team has a pile of 9 pucks at center ice.

On the whistle the first player in line from each team will collect a puck for their pile and go in for a break away.

If you score, you must race back to your team before the next player can go.

If the goalie makes a save or you miss the net, you must collect your puck and skate it back to your pile of pucks at center ice. Once that puck is placed back in the pile then the next player can go.

First team to put all 9 pucks in the net wins.
