

## Endzone Outlet Regroup Game - Coach Barry

End Zone Outlet Regroup Game develops puck recovery, breakout connection, and regroup timing. Set one net with goalie. Each team has two players inside zone and one outlet on outside dot. Coach spots puck, both teams send one player to recover. On recovery, players must breakout and both touch puck before passing to outlet. Outlet leaves zone and regroups to attack net as 3 player unit. Defenders must recover and activate their outlet to transition. If possession is lost, attacking team resets and must reconnect before activating again. Builds support, timing, and transition awareness.
