

Net Front Chaos 1 vs 1 with Snipers

Description

This is a small area 1 vs 1 game focused on net-front habits and competitiveness.

At the whistle, players must drive through the tire **without decelerating**, simulating a hard net drive. The objective is to create a realistic net-front situation with speed and intent.

Players must then **crash the net, hunt the rebound, and apply immediate pressure on the goalie**. There is no hesitation – the focus is on attacking the puck with urgency and commitment.

Following the initial rebound play, players transition into a live 1 vs 1 situation where they can use the **snipers as support options** to create a scoring chance or escape pressure.

The game encourages players to compete in tight spaces, react quickly to rebounds, and develop strong net-front behaviors under pressure.

This game emphasizes learning through constraints and developing real game behaviors rather than isolated skills.

Key Points

- Compete hard in net-front situations (box out vs box in)
- Attack rebounds with urgency and intention
- Quick release and second effort around the net
- Use snipers to support and extend the play
- Emphasize decision-making under pressure
- High level of competition
